

BT movit

BT Movit *N-series Range*
1.0-1.5 ton
Electric towing tractors

The BT Movit N-series range of electric tow tractors includes higher travel speed and increased towing capacity. With an operator's interface for improved driveability, stronger motor and larger battery the model range will operate with high productivity and maximized uptime.

The very low step-in height and easy-to-use controls provide an efficient operation where frequent on-off truck work is part of the normal work pattern. Frequency-Adapted-Suspension of the floor is a natural part of an overall ergonomic and comfortable work place. The low weight of the truck makes the truck range suitable in most environments including mezzanine floors and elevators. The versatile range is available as order picker and tow tractor models and features a wide variety of load carriers.

BT Movit TSE100 - 702

1000 kg capacity tow tractor. Lightweight model with narrow chassis to suit tight areas as well as large and open areas. All models features an easy and fast battery change option with battery change made in less than one minute.

BT Movit TSE150 - 708

1500 kg capacity tow tractor and still a narrow chassis model. Includes an ergonomic and comfort backrest for best operator's posture. Can easy tow multiple load carriers.

New operator's interface

Organized work place with perfect view over controls and display. Intuitive and easy-to-use steering wheel and controls. Compartment for items used in the daily work as pens, knives etc. Easy to adapt the work place for PC equipment. Simple PIN code start without need for a key as on most of the BT range of products.
